Wanted: PHP Web Developer Contractor

MMI is a leading edge technology company, specializing in web application, multimedia, and 3d application development. Our clients include Disney, Bank of America, Sony, Johnson and Johnson, and Nike. We are located on the historic square in Newnan, GA.

MMI is seeking an experienced PHP web developer for contract work on a long term project and additional smaller web projects. Applicant must be proficient in PHP and other technologies listed below. The position will require working inside our internal PHP based framework and expanding with new features. New features and modules will need to integrate with existing systems and functions. Experience with agile development methods and unit testing are a plus.

This will be a team based work so on-site work, especially at the start of the relationship, will be required. Full on site also preferred if possible.

Responsibilities and Requirements

Project Related Competencies:

- Programming solution development and delivery using a variety of web technologies
- Leading small groups of developers
- Quality assurance for code and systems developed or modified
- Working with and assisting fellow developers

Core Competencies:

- Strong communication skills
- Knowledge of programming languages, relational databases, system architectures and related concepts.

Professional Skills:

- Leadership- develops mutual trust with coworkers
- Teamwork- effective working relationships.
- Client satisfaction- understands and works to fulfill client expectations and works to anticipate clients needs

Organization Responsibilities:

- Professional Development- seeks opportunities to broaden and develop knowledge base and proficiencies.
- Internal Operations, contributes in internal initiatives and procedures.

Technologies, Concepts and Tools

Must have significant experience with the following technologies and concepts:

Javascript
Ajax
JSON
XML
CSS
HTML/XHTML
